When some folks get themselves revved up on a specific farce, they can't stop. One such unfortunate, a former Las Vegas promoter named Tom Biscardi, is currently wondering whatever happened to his two "partners" who accepted from him a $50,000 advance on future earnings that were to be earned from exhibiting the frozen body of a bogus Bigfoot. Matthew Whitton and Rick Dyer, the genuine bipeds from Georgia who claimed to have found and chilled the Bigfoot body, are now being pursued by Biscardi, whose money they seem to have absconded with once the frozen "corpse" was revealed to be a hoax. Really? Wow!
